LOOKS LIKE DRAC'S BACK IN TOWN.

Something immortal is lurking in the mountains above Transylvania. The Prince of Darkness has formed a monolith of unspeakable horror in the second ghastly adventure, Castlevania II—Belmont's Revenge™. Four towering castles ridden with hideous creatures that would even make the mightiest of warriors cower in fear.

Nevertheless, Christopher Belmont must set out to face mobile brain matter, undead assassins, and the Iron Doll in the Stone Castle. Ghastly forces like Kumlo & Nimbler and flesh feeding jellyfish slither through the Cloud Castle. The Plant Castle is the horrific home of Angle Mummy, carnivorous Wolf Spiders and other slimy swamp mutants. And an unspeakable array of acid spewing snake heads and moat monsters lurk in the Crystal Castle. It's crucial that you find power up items to attain battle axes and holy water, your only hope against this underworld army.

So grab your Mystic Whip and say your good-byes. Darkness will soon be upon you.

BIG, BIGGER, BIGGEST!

As you probably have already noticed, this issue of EGM is pretty large. Two hundred and four pages and it's our largest issue yet! We've come a long way since this time last year when we were at 84 pages, but we're not one to look back for too long. Having hit 200 we now will shoot for 250 and even more by the end of the year. Of course we couldn't do it without the support and confidence of the advertisers and readers. We've grown fast because we have been able to evolve quickly to meet the needs of the gaming industry. Contract publishing is but one example of what the industry, and the readers wanted. Also, with lead times measured in weeks rather than in 3-4 months, you get to read about items which can still be called news. Game reviews are honest, and sometimes downright brutal. Fortunately companies now realize, that with cart rentals so popular, players will more often than not, rent games before they buy them, and whether we give the game a 3, or the kids rent it and see that it is bad, all the smiling faces in the world won't make it better.

And we're on a roll! More pages means we can cover more games, for more systems, with more pictures and more information. Considering all the new games coming out by the holidays the other 100 page books just can't cover everything sufficiently. Look for expanded coverage in our arcade section, new supplements and inserts, more fact files and, of course, more multi-person game reviews.

Speaking of supplements, you will have to check out the huge 96 page Sega Force supplement in this issue. Anybody who owns a Sega system will find virtually every licensed product available. And then some! Don't forget to check out the Sonic Comic! If you don't own a Genesis, Game Gear or Master System 2 then reading through the supplement might help you change your mind. Of special note is the fact that this is the first authorized Sega magazine outside of their own publication. We appreciate the trust that they have in us to fairly describe their products. As usual, it's here first, and then, only in EGM!

The S-1000 SONIC THE TERMINATOR!

MOST TRIUMPHANT!

Bill & Ted's Excellent Video Game Adventure™ for your NES lets you power up to six different worlds searching for historical dudes lost in time. Most Heinous! Better send them back quickly or you'll miss the Wyld Stallyns concert...starring Bill and Ted.

Bill & Ted's Excellent Game Boy® Adventure™ sends our two most excellent compatriots, Bill and Ted, on a "Bogus Journey" against evil versions of themselves and the Grim Reaper as you race against the clock to collect stolen time fragments. Stellar! Tough choice, dude. But you know what Bill and Ted would do: Choose both!

The locals give you clues to the whereabouts of famous historical dudes.

Party on with the Wyld Stallyns – if you complete your noble quest.

Say Ted, isn't that Ted? No way – yes way!

An evil plan to totally destroy your future? Bogus!

Collect stolen historical fragments, like bodacious Billy the Kid's Sheriff Star.

Run out of time and the most heinous Grim Reaper sends you to the land down under.

NOT VOID IN CANADA!

Seventyfive mags a month run through my fingers at the computer and games company I work for and of all of them, your publications (EGM, Mega Play and Computer Game Review) tend to sell out fast.

Enclosed is a video game column which is run in our newspaper and my friend who writes it has come up with a thorny issue as to contests regularly held by many magazines in which Canadians are excluded from entering. Now I understand that the laws in the U.S. and Canada are different, but I have been entering (and winning) contests for over 20 years. It is a little odd that I can not enter any of the video game magazine contests. Can you explain why?

Douglas Orlowski
Thunder Bay, Ontario

(Ed. Thanks for sending us a copy of the 'Video Cowboy's' column. As he pointed out there is no mention of any exclusion for Canadians in our contests. And that is correct. We have never placed any restrictions in our contests, as they are open to anybody and everybody. While there have not been many winners from Canada, the vast majorities of the contest entries do come from the U.S.

Unlike the other magazines whose contests are all based on a random drawing, we do have our monthly 'High Score' contest which is based on skill, not the luck of a random drawing. So Mr. 'Video Cowboy', while we can't give Canadians preferential treatment, we do have this contest which evens up the odds. All your readers have to do is send in their best score on an official entry form (with a screen photo for proof). Also, if they send in a trick that we publish we'll send them a free game!)

S-NES=SUPER FAMI?!

I've been hearing a lot about the Super Famicom and the Super NES but one thing that nobody has talked about is the compatibility between the systems. From the specs, the systems seem identical. Are they?

Bill Sanburn
Augusta, GA

With the Super NES about to come out, one item you haven't addressed is cartridge compatibility. Since the Famicom carts work fine in the NES with the adapter board, will the same hold true for the Super Famicom games in the Super Nintendo?

Keith Peters
Baltimore, MD

The Super NES store date has been pushed back to September 23rd!

(Ed. Although the production version of the Super Nintendo is not in the stores yet, we have heard from our sources inside Nintendo that the Super NES/Super Famicom compatibility will be similar to the Genesis/Mega Drive. That is, the Super Famicom carts will have the same pin configuration as the Super NES carts! The cartridge port on the Super NES will be a slightly different shape, but with a little shaving around the port the Super Famicom carts will fit...and work! While we find this difficult to believe because of the much publicized problem Sega is having with the 'unauthorized' Japanese carts being sold in the U.S., the big N doesn't seem to be concerned. Or so it seems. We'll give you a definitive yes or no next month.)

MORE MEGA-CD...!

Awesome dudes! I couldn't believe my eyes! Your Mega-CD coverage in your September issue was truly amazing. Like, everybody else just announced that the CD-ROM was coming and showed the same picture. You had photos of the system in operation, detailed all the specs, and then followed it up with a list of games and real photos! How do you do it? Do you have a source inside Sega?

Matt Avalos
Cincinnati, OH

I must compliment you on a great job of reporting. Your Mega-CD coverage in August and September was (and still is) unequalled. I've read all the stories in the other mags and they all sound the same. What's this about a Genesis/Mega-CD selling for $750?

Gerald Witzock
La Jolla, CA

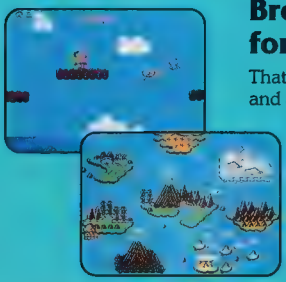

(Ed. Thanks for the compliments guys. We always try to go the extra yard to get the information that you want. The reason nobody else ran the specs is because the press release that Sega handed out at CES only talked in generalities. The official world debut was in Tokyo and that is where the real information was. As we stated before, and this is a good example, anybody can write about something when they are spoon fed by the companies but, we don't accept this any more than you do. You can always count on us to get you the real story. JVC plans to bring out a combo unit next year.)

HAPPY TURBO PLAYERS..

You guys are unbelievable! I just got my September issue and had to tell you how much I liked your Turbo supplement. I have been thinking about getting the CD-ROM but there just weren't enough discs out there to make it worth while. After seeing photos of what was coming out in the near future, I went out and bought the CD-ROM plus Y's, Sherlock and Murder Club. Thanks again for supporting this great system!

Nathan Shapiro
Franklin, IN

Unbelievable! Sixteen pages on my favorite system! Nobody has been really covering the Turbo (including you), that is, until now. The insert alone was worth the price of the mag.

Gregory Brackeen
Los Angeles, CA

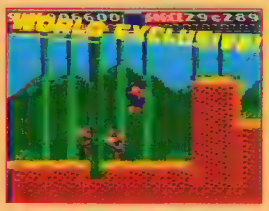

(Ed. The letters, calls and fax's [(708) 916-7227] are just starting to come in with opinions on our September issue. Besides comments about the huge size of the mag, we are hearing great things from you about our inserts. Expect to see a lot more from our Contract Publishing Division as more and more companies are signing up to run inserts in only one mag - EGM!)

MORE GAME GEAR...

I just bought Sega's Game Gear because it is a good compromise between price and performance. The carts are decent but I wish there was a larger selection. Are there more coming out soon?

Mark Winston
Corona, CA

(Ed. Hang in there Mark! The GG is gaining in popularity and Sega is doing everything possible to crank out new softs as fast as possible. Check out our Game Gear section in this month's Sega supplement for a complete listing of new games.)

Ninja Gaiden on Game Gear!

HAPPY 2nd BIRTHDAY GENESIS!

On August 14, 1991, the Genesis celebrated it's second birthday. We here at the Sendai Publishing Group Inc. are always up to doing something different, and this occasion was one which we couldn't pass up.

Getting a baker to make a cake in the size, shape and colors of the Genesis in 24 hrs. was easy (Try explaining to a baker what a Genesis is over the telephone!) But, getting it from Illinois to California in 4 hours, and keeping it in one piece was quite a trick!

This cold setting for an NES title has you tossing snowballs at the other creatures trying to pack them in and fling the freshly made snowboulder at the other enemies. Use your mastery of the snow and end this terror once and for all.

STEVE

Our head editor-type guy is off to Japan to collect the hottest softs for all the systems while taking in the sights and sounds of good ol' Tokyo! Sushi, anybody?

Snow Brothers reminds me a lot of similar maze action games like Bubble Bobble that take a simple theme and elevate it with a seemingly endless variety of scoring and point incentives. The game still suffers from a fair level of repetition, but it is a good diversion for awhile.

ED

It's off to Tokyo again to check out the latest in new 32 bit technology. Lots of top-secret things going on & Ed's taking a lot of super-fast film to sneak a few pictures.

The arcade game was a blast. Once in a while I like to brain games and this is one which I can sit down and play through dozens of levels just to relax. Not a lot of concentration needed.The execution of the game is very good and it is a blast to play. Great bosses!

MARTIN

Our number one game player is totally impressed with the Mega Drive CD's first few titles. He also likes using it to blast his Sacred Warrior CD's around the office.

This game is a bit like Bubble Bobble and Parasol Stars. The graphics are cute and the game plays very well. The graphics aren't stunning are not spectacular but the game play is solid and easy to get into. The addition of bosses to this type of game is a definite plus.

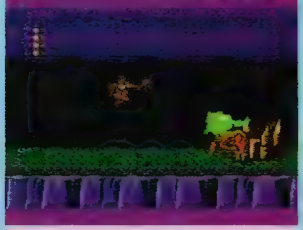

SUSHI-X

Sushi-X is going to be entertaining our two leaders in Tokyo. He's quite a wild party dude and when we ask what they will be doing, he just smiles and mutters some Japanese.

Snow Brothers isn't a bad game for the money. Even though the overall idea isn't top-notch, the execution is coordinated extremely well. The graphics are reminiscent of a rehashed MegaMan title. You'll enjoy the cheerful sound track even despite the 8-bit sound limits.

Nintendo - Bandai
Frankenstein

Type:Action Release: Now
Levels: 4 Difficulty:Avg.

For years the monster that has once terrorized the innocent village. Now the monster is alive, and ready to take on the village once again! Armed with an arsenal of different weapons and magical items needed to lay the monster dead for the last time. Many strange creatures will try to stand in your way as you hack and slash through the levels that await your arrival and for your destruction. Be brave, valiant hero.

Frankenstein is one of those games that is just almost there. Like some of the basic set-ups that the game delivers, it just comes off as being a little too rough around the edges. The graphics aren't bad but the lack of real diversity in game play is what hampers Frank the most.

Frankenstein is a game that is good on last year's standards. With a little more attention to detail and some final tweaking it could have been a hit. As it is it's only a bit better than average and just doesn't stand apart from the rest of average games out there.

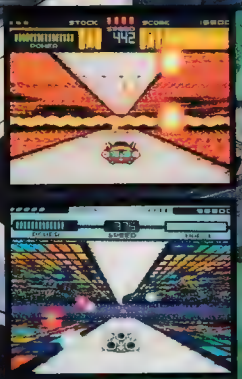

This cart is not a bad action game nor is it a great game either. The main character is limited to a few moves and picking up weapons. The graphics are OK, it looks like you're beating the monsters with a chicken leg though. Just another average action cart for the NES.

I'm sorry, but I'm not all too excited about this game. Frankenstein is a great idea, but the control isn't precise enough to make the game any fun. I'll attribute the problem to the 8-bit barrier once more. Otherwise, it is cool, with a few minor quirks to overlook.

Micro Machines

Type:Racing Release: Nov
Levels: 24 Difficulty:Avg.

The popular line of race cars is soon to be released on the NES format! The unique trait of this exciting title is that you'll need to race your cars in the strangest of places, like sand boxes, breakfast tables, desktops, and pool tables. Race against the other children to build up your collection of cars. You can have boats, dragsters, dune buggies, and many more in this enjoyable and innovative cart!

Micro Machines doesn't exactly boast the best in graphics or animations. It also doesn't have the best sound support I've ever heard in NES game. What this cart does have is exciting play mechanics and enough style and interaction that's necessary to be a winner.

Even though it looks like a simple game, it couldn't be farther from the truth. This is a spectacular, challenging and exciting game taking place on some very unusual type of terrains like the breakfast table and garage floor. Definitely one to look for as it is a lot of fun!

This cart seemed like a kiddie cart at first, but it proves itself to be a great playing game. There are a variety of different vehicles that you can drive and the tracks are really cool. The game offers solid play with a unique theme and enough innovation to keep you interested.

This game is really a lot of fun! I love the overhead interactive and inventive race courses! We've seen radio-control car races and now mirco cars! True, as a kid I loved miniature cars and racing them with my friends, but I don't think that influenced my decision...

Nintendo - Data East

Bo Jackson Baseball

Type: Sport Release: Sept.
Levels: N/A Difficulty:Avg.

The minds from Data East have come up with the new form of baseball simulation. Bo Jacksons has you hitting and pitching all of the different forms known in a professional game. A lot of variety has gone into this cart, like different catches where you can jump and dive for the ball and others like stealing bases. This cart contains all that a baseball fans wants and can now have.

This game just doesn't have the heart and soul necessary to stand apart from the many other similar titles now available. On its own Bo knows how to dish up average graphics and limited game play. Instead of taking us in new directions, you get the same old rehash.

It is getting harder and harder to make significant improvements to the existing baseball games. While Japan has to have new games every year the U.S. is different. This is a good game in it's own right but virtually every player already has a baseball game in their library.

Yet another baseball cart that falls short in terms of game play. The graphics are good but the the pitching and the batting are awkward and become frustrating. There are a couple of original features like instant replay but not enough to save this cart from the me-too blues.

Nope! Bo don't know video games! If he did, B.J. Baseball would have been smoother, cleaner, and have more options than it does. The music isn't horrid, but it needs a little work. The graphics are better than an Atari 2600, but the buck stops here. This game will sell on name alone.

Nintendo - Sunsoft

Super Spy Hunter

Type: Action Release: Oct.
Levels: N/A Difficulty:Hard

Spy Hunter has reserved a place in the classics of the coin-op games. Now the sequel is soon to hit the screens of the NES! Have your car dash through the city streets, waterways, and many other panoramas as you try to destroy as many other enemy cars before they get you! Your weapons have been greatly enhanced so that you have 3-way flying packs and missiles with the classic oil slicks and others!

Spy Hunter is a classic arcade game and the NES sequel is just as cool. The game play is great and there are a ton of good power-ups. Graphics are good, if a little bit washed-out. Good solid action that would be even cooler with the possibilities offered on the Super NES.

Sunsoft is on a roll. They are picking and producing great games for all the systems. Super Spy Hunter fits this mold and is solid excitement! Great variety of screens, good weapons and above average graphics. Exceptional control and just a great game overall.

I like Spy Hunter in the arcade and on the NES and this sequel is worthy of the Spy Hunter name. There are a number of cool power-ups and the game play is very good. The graphics are a bit pastel but the cool road effects and fast action make up for the game's minor flaws.

Super Spy Hunter is radically cool! I liked the arcade coin-op, so this addition the NES library is welcome! The graphics are excellent and the weapons are out-of-this-world! The music is jamming (for a Nintendo), and the control is rock-solid. SSH's only fault is the 8-bit limitations.

Nintendo - Lucasfilm
Star Wars

Type:Adv. Release: Nov.
Levels: 8+ Difficulty:Avg.

Based off of the classic hit movie, Star Wars follows the plot of the movie almost exactly. As you proceed through the plot, you can collect important items such as blasters, light sabres, and many other useful items. Also you can find your friends and switch off from one to another. Speed over Tatowene in your landspeeder or switch to a side scrolling shooter in Mos Eiley. Fun for all ages!

Star Wars is a pretty cool adaptation of the movie on which its based. It combines basic RPG elements with a number of different play themes and static intermissions to move the story along. The set up is painfully tedious at times when you have to repeat areas, but all-in-all it's a good effort.

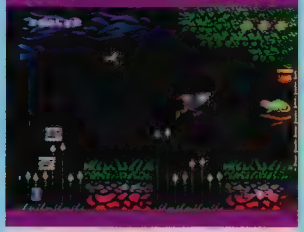

The movie set standards the industry is still trying to equal; the company can perform magic, the game unfortunately does neither and is very flat and ordinary. Not enough variety, the action never gets intense, and it just doesn't have the Star Wars excitement. A big disappointment.

Sorry to say that this game isn't as great as the movie it is based on. The graphics are distorted and the space scenes are awesome, but action scenes could have been spiced up lightsaber battles. It is a good cart but lacks elements that would make it a great cart.

All right! As the number one fan of the Lucasfilm movie series, I've been waiting (rather impatiently) for this game! Let me tell you, it's hot! This line of Lucasfilm titles (Empire Strikes Back and Return of the Jedi as sequels) are sure to be loaded with intensity and challenge!

TurboGrafx - NEC
Impossamole

Type: Action Release: Oct.
Levels: 12 Difficulty:Easy.

Monty the mole was resting out on the beach one day, when all of a sudden the sky went dark. That next moment a spaceship descended from the clouds and took Monty aboard. The aliens then gave Monty super strength and weapons so he can take out the other alien attackers that are plaguing the Earth. Kick them into crumpled lumps, blast 'em with your bazooka, it's all up to you to save mankind.

Impossimole is a valiant attempt at recreating the action of other character-oriented games, but this title falls short because of the lack of personality (i.e. technique) that the title hero has to offer. It's a basic action game with some play mechanics just too limited.

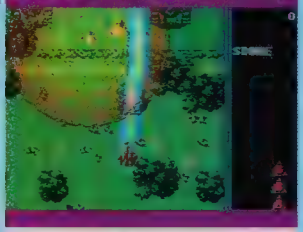

This is a cute game for the kids. Serious players won't think it has enough challenge but the younger players will find it tough enough for their abilities. A good effort but too limited. Good games can be made that appeal to audiences - like Bonk. Only average at best.

Nice try NEC, but a mole just doesn't come off as a great super hero like Mario, Sonic and Bonk. The music needs work as it just doesn't add to the game. The game play isn't precise enough and the character needs more variety in terms of technique.

Impossamole is completely impossible! I was irritated from the moment I pushed start. The game play needs work, and the music was less than average! The graphics are decent, but it won't win any awards, that's for sure!! Cinemas are cool, but they don't make a good game.

Genesis - Micronet
Raiden Trad

Type: Shoot Release: Now
Levels: 8 Difficulty:Avg.

The Earth is in peril, the human race in in an uproar due to the fact that a huge battlefleet of aliens whose greedy eyes are set on our home! The Forces have no time to set up an accurate defense force to combat the invaders. However, an experimental craft has been invented and has enough power to halt the aggressors advancement. Loads of weapons and bombs highlight this intense shooter.

RaiDen is nothing more than an all-out explosion of head-to-head blaster action. You get a number of power-ups, lots of fire-power and the usual cast of bad guys and bosses. Sure, this isn't anything new, but it's presented in a very slick manner that makes the trip worthwhile!

An excellent vertically scrolling shooter. It isn't revolutionary as it utilizes older third-and true game play. But what makes this great is the fact that it does everything perfectly. Challenging game play, a good difficulty curve and graphics that are among the best on the Genesis.

Raiden is an exceptionally tough game in the arcade, this version is a bit toned down but still retains most of the aspects that made the coin-op a classic. Great game play that is filled with power-ups, tons of enemies to shoot at, and awesome explosions.

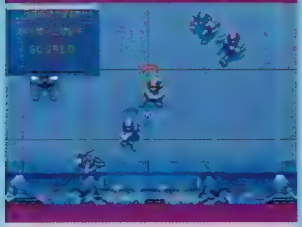

Raiden Trad doesn't appeal to me for one reason: originality. Why do all shooters have the same powerup varieties and weapons? Gaiares had first innovative powerup method in a long time! Otherwise, Raiden Trad is a good shooter, and takes its place in the huge family of Genesis shooters.

Genesis - Arena
Speedball 2

Type: Sport Release: Oct.
Levels: N/A Difficulty:Hard

The popular PC game of the same name is soon to be released on the Genesis. This cart has you dashing around the playing field after the ball trying to get it past the goal post. This is obviously not as easy as it seems. The other players can attack your teammates at any time! This doesn't mean you cant attack- of course. Before the game, you can adjust your stats and modify to make your strengths. Time to rock!

5.5

While I give this game a couple of points for at least trying to give us something new and different, the execution and control just don't deliver. The futuristic sport doesn't really get you excited in the way a football title might and even though it's a nice try it comes up short.

6.5

Speedball 2 is a challenging futuristic soccer/rugby-type game. To me it is a lot like Power Ball and while the action is intense and the game play good, there is still that much difference between the two games. Needs more detail and sound otherwise it's OK.

5.5

Speedball 2 is an OK computer game to port over to the Genesis. But the game still plays like a computer game and that isn't too great. The graphics are yet good yet very choppy and the there isn't any background music. Not one of the better sports game available.

5.5

Speedball - another name for a fast sphere of energy that you chase around, smacking opponents and laying them out on their respective duffs. Sound exciting, probably not, because this has been done too many times before. Oh well, creativity is hard to find.

GameBoy - THQ
Home Alone

Type: Action Release: Oct.
Levels: 5 Difficulty: Avg.

This cart continues the story of the boy named Kevin who stopped two thugs from entering the house when he was home alone. Now that they are out of the slammer, they want revenge! This time they have assembled a team and are going to raid his house again! Guide Kevin through the many levels collecting the valuables and trying to seal them in the vault downstairs. Are you able to stop them this time?

5.5

While this game capitalizes on the successful comedy, the developers of Home Alone missed a grand chance to really create a game that could have opened up a new category for video: games that make you laugh! It's a standard action-wanna-be that's slow and tedious.

6.5

Home Alone captures some of the flavor of the movie. As a game it is OK and has some good action sequences. But, with a bit more effort it could have been a great game. Needs better control and more variety. The graphics are too plain and don't help the game along.

5.5

This game needs work. While the movie it is based on is very funny, the game doesn't convey the same intent. The game play needs major work and the music is unacceptable. Hopefully the NES and Super NES versions will be better. Not the best game they ever did.

5.5

Home Alone is another example of a Name Game - it'll sell on name alone. The game itself is okay but it deserves the average rating because it is all-around average. Unfortunately, An incredibly funny and successful movie like Home Alone demands a better game.

Lynx - Atari
A.P.B.

Type: Action Release: Oct.
Levels: NA Difficulty: Avg.

Crime is on the rise in the city streets, and you can bust them all! Fly through the streets locating speeders, pull them over, and bust 'em! You can also pull into hot dog and doughnut stands so that you can revitalize you supplies and gas stations will help you get more fuel. You can even find parkways that you can drive around in to locate money bags for big points. Time to clean up crime!

6.5

APB was a prime example of a "player's game" when it was released in the arcades. The game is packed with plenty to interact with but eventually proved too complicated for most players. It gets a second chance and even though some parts are gone - it's still pretty good.

6.5

A very good translation of the arcade game. The action sequences are well done although scaled back quite a bit unfortunately to the point where there isn't enough variety to hold a players interest as some of their other titles do. The parkway scene is exceptionally well done.

6.5

This is a good translation of the arcade game and the voices are extremely well done. The game play is very repetitive and leaves much to be desired. The graphics are only average as far Lynx games go. This cart just lacks the intensity that it needs to stay interesting.

5.5

A.P.B. on the Lynx isn't what I expected, but it's okay. I was looking forward to some cool scrolling and scaling, but none of it was present! The music is decent, but not spectacular. The Lynx is capable of so much more! I wish I'd see more games like Ninja Gaiden or Klax.

GAMING GOSSIP

...Super NES Compatibility With Super Famicom...Update On Batman 2 Video Games...Hook Gets Veterans... 32-Bit Game System A Reality...New Dragon's Lair Coin-Op...Lynx Software To Include Big Names...

...Hold on to your carts on my little Quartermaniacs, it's Quartermann here to put some sizzle back into your joysticks with a load of red-hot rumors from those in the know. Foreign correspondent Terry Aki again gets dual billing this month with some tasty dirt from the streets of Japan, but the Q-Mann would like to begin this month's exciting episode with some ultra-secret news on the new Super NES that isn't...It appears that General 'N' has pulled a fast one on us my Q-fans, but for a lucky few this rumored fluke could be a bonanza! Anyone adventurous enough to pry into the guts of their Super NES has found a nice extra feature - complete compatibility with the Japanese Super Famicom. Similar to the operation that Doc Q pioneered with the Genesis, it appears that the Super NES can be slightly modified to accept Japanese softs! While this would, at first glance, look to be a great benefit for our international fans, Nintendo's hidden agenda - if current rumors serve me right - will become apparent when the machine goes into its second and subsequent production runs. Nintendo evidently will only allow the first wave of Super Nintendo's in the states to enjoy this compatibility, they reportedly plan to scramble the brains of future Super NES releases as a poke in the eye to foreign importers. Very clever Nintendo, but what a premium all of us first-in-line guys are going to get should we decide to sell our bilingual units! Ha - ha - ha...

...In addition to Nintendo's playful ploys, the Quartermann's ports are also in an uproar over rumors from my brown bagged Genie that Sony Imagesoft may have launched a coup against Capcom to capture some of the company's hottest talent. While this can't be confirmed, sources close to both companies have told Quartermann that the soft Sony is so wild over is none other than Hook - the Steven Spielberg adaptation of Peter Pan due for Christmas...What a let-down! I was so looking forward to seeing Sigourney bald in Alien 3 this year, but now it looks like the studios are pushing this final installment in the series back into 1992...Batman 2 is looking to be quite a prolific title when it finally rolls around onto video game screens next year. Among the parties interested in the sequel to Tim Burton's vision of the Caped Crusader are Konami for the Super NES and Sega for the Genesis. Yours truly can't confirm either of these announcements directly, but the possibilities for dueling 16-Bit Batmans is quite an interesting concept...

...It looks like a true 32-Bit system is definitely going to be a reality sometime next year - at least in Japan. Sources close the Mr. Q have just such a system now feverishly being worked on by the hardware gurus of Hudson in Japan. Whether this super system will show its face wearing an NEC label has yet to be determined, but one thing for sure is that it's loaded with plenty of good looks and a great voice!...The Quartermann has to wonder, since the Jaguar is in reality a dual set of 32-Bit processors, could there be a connection between the American release of a new Hudson system and the Jaguar? Stay tuned...Dragon's Lair 2, which neared completion several years ago but was shelved when laserdisc players became taboo in the coin-op world, will now get a second chance at life. In the face of games like Mad Dog McCree that have shown that a good game will draw bucks - even if it is a laserdisc title - Dirk the Daring will finally get a chance to redeem himself in Daphnia's eyes...

...Don't be surprised if you see a 16-Meg Genesis game in the near future...Do you think that Nintendo could have made the new Super NES look any cheaper? C'mon guys, the Japanese version had some style, but this machine, from its disappearing ejection button to the cute little Sara Lee mold that it looks like it popped out of, is really the pits. Sure, it IS what's inside that counts, but couldn't you think of something with a little more muscle to it?...Bet you didn't expect to see your name here, did you Mr. Nielsen...Look for the Atari Lynx to pop up with some major league licenses in the coming year. Everything from sports games to Ninja Gai Den 3 may find their way on the powerful portable...Until next time my Quarter-friends, don't get hit...

NEW 'WIDE GEAR' AND 'WIDE LYNX' LET YOU PLAY GAME GEAR AND LYNX GAMES ON TV!

Sega has taken their small, inexpensive and compact Game Gear color portable game system and made it, huge, bulky, nonportable and expensive! Why?

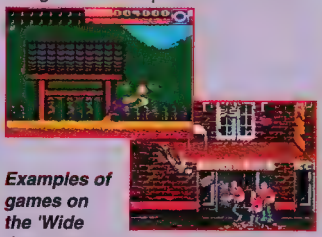

Companies which make games for the GG need, what is called, a 'development system'. This device allows developers and programmers to check their work on a monitor and, with the open, spread-out layout of the system, game chips (EPROM's) can be quickly inserted and removed without a great deal of effort.

Besides being invaluable for game development, systems like this (and the GameBoy 'Wide Boy') allow for the taking of clear, sharp, RGB game screen photos. Companies use these pictures on their game boxes, instruction manuals and product literature. The game magazines in Japan also use this system for taking pictures for their game reviews.

In a similar fashion, Atari has created a 'black box' which takes the screen image from their portable Lynx, pixelizes it, and sends the new image off to a monitor through a set of standard audio/video outputs. The major game stores in Tokyo use this device to demonstrate the Lynx games.

Sega has created a new system which lets you watch Game Gear softs on a monitor!

Examples of games on the 'Wide Gear' (Ninja Gaiden) and 'Wide Lynx' (Ninja Gaiden)!

Atari has a 'Black Box' which sends the video and audio signals to a TV!

GALAXY GAZETTE

Aerostar Blasts To Earth!

It has been many years since the Intergalactic Council allowed the earth to be populated after a series of devastating wars. In the years following our return we as a people have struggled for survival. The most difficult battle is still ahead. At this writing, mutant forces are wreaking havoc on our defenseless planet.

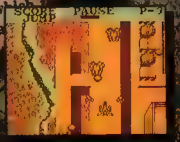

Our cry for help has not gone unanswered. The Intergalactic Council has made an effort to stop these violent attacks by deploying AEROSTAR. This state-of-the-art nuclear-generated vehicle of destruction is ready to face the most intense combat. Unfortunately, AEROSTAR is missing the most important factor—a pilot.

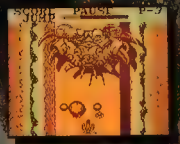

As the search for our defender persists, conditions on earth grow worse. The human people can only hope salvation is near.

AEROSTAR

Intergalactic Council Meeting Today.

...members from nine galaxies are ... to discuss the future ... forces. They ... hope to reach an agreement on w... to destroy the enemy. Earth lea... attacks. Intergalactic ... Earth soon.

Light Boy is Bound to Attract Attention!

I can't take my **Light Boy** any place without making a commotion. All I wanted was a few private moments on the Game Boy before the offense got off the field; but now I've got these rookies from the other team in here. They like the way **Light Boy** makes the Game Boy screen light up in the dark. The 1½ times magnification is great, too. **Light Boy** is bound to attract attention. Now, how do I get rid of these guys?

- Bilateral lighting
- Batteries included
- 1.5 magnification
- Replaceable light bulbs

"Hasta la vista, baby..."

Not exactly the words you'd expect from your everyday, run-of-the-mill, cyborg super-killer. But then again, who ever said the Terminator was run-of-the-mill!

Terminator 2: Judgement Day has appeared as the uncontested blockbuster movie of the Summer. Combining intense action sequences with some of the most spectacular special effects ever seen, T2 has emerged as the first real cinema *event* to come along in many years.

Buoyed by the success of the Terminator movies, both Williams and Midway have stepped forth to capitalize on the appeal of the futuristic films with new pinball and video games that deliver an action-packed experience that rivals their namesakes.

Both the Terminator 2 pinball game, developed by Williams Electronics and the Judgement Day video produced by Midway boast all the trappings of movies on which they're based. Given the scope of Arnold Schwarzenneggar's latest action epic, this is grand praise indeed!

The origins of both Terminator games, surprisingly, started at about the same time as the movie. Just as principle photography was beginning in Los Angeles, Roger Sharpe and his staff of talented game developers embarked on a challenging new mission to capture the sprawling universe that director James Cameron was putting on film.

"From the first time we read the script, we knew that T2 was going to be a hit," explained Roger Sharpe, VP of Marketing for Williams who was instrumental in acquiring the license to Terminator 2.

While the goal of both the video and pinball game was to recreate the same feeling one would get from the movie, both design groups faced a number of obstacles on their way toward duplicating what is now one of the highest-grossing movies of all time.

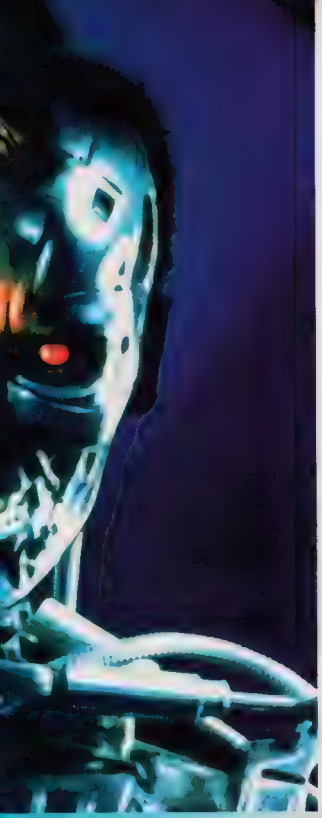

"One of the problems we ran into concerned the disclosure of the T-1000," said Steve Ritchie, the head designer of Willaims' Terminator 2 pinball game. "The producers wanted to keep Arnold's nemesis a secret until the day the movie was released so we were limited in the amount of coverage we could focus on his role. Other than that minor restriction, everyone involved with the movie was extremely supportive in the designs we created," he continued.

Developing the T2 pinball required the designers to be even more creative than ever before. After all, with video the producers have the luxury of using pixels to form shapes that can be recognized. Translating the high-speed chases and assault against the computers seen in the movie into something understandable with a silver ball and flippers can be described as difficult at best.

The video effects in Midway's Terminator 2 game are revolutionary!

The awesome new Steve Ritchie design - Terminator 2 from Williams

Remarkably, Steve Ritchie and his team of veteran pinball wizards have succeeded in this quest and, in the process, delivered one of the most heart-pounding, multi-objective silver ball contests ever. The game plays like the Future War opening segment from the movie and, like that scene, never lets up in its intensity!

With explosions filling the play field and Sky-Net standing between you and the liberation of mankind from the cyborg monsters, you must strike out against the Sky-Net computers while defending against Hunter-Killers and Terminators. Go straight for the Terminators for a quick multi-ball play or work your way through the ramp shots to break down the Sky-Net defenses and initiate additional scoring incentives.

Along with the power-packed game play, Terminator 2 boasts some of the most attractive visual and audio support ever seen in a pinball. This includes actual digitized speech from the movie as well as additional tracks supplied by Arnold himself. All of these elements are combined into one package that carries the highest level of challenge and fun. Kill Sky-Net? No problemo!

A NEW BREED OF VIDEO GAMES

Equally impressive is Williams' new Terminator 2 video game. The giant leaps in gaming technology that are displayed in the Terminator 2 pinball game are matched in the Judgement Day video game that takes digitized screen images and integrates them into play to create an incredibly realistic environment that looks almost as good as the movie.

Working with Fantasy 2 and the rest of the effects technicians responsible for bringing the incredible world of Terminator 2 to life, the producers of Midway's new video game have captured the actual feeling of the movie by taking pieces of the film, adding scenes and using the same models and actors seen in the movie! As much as CD-ROM boasts of taking video games to the next level, Terminator 2 actually succeeds!

Terminator 2: Judgement Day uses its state-of-the-art graphics in a conventional head-to-head gun game with more than a few perks built-in for advanced players. You must lead the resistance through Future War, guard John Conner, the leader of the resistance as he makes his way into Sky-Net Central Command, blow up the computer and send a reprogrammed T-800 to the distant past as a protector. Like

the movie, the action then moves to the present day where Sarah and John must be protected. One of the coolest features of the T2 video, however, is the manner in which the designers have incorporated actual film footage into the game, including parts of the movie that didn't make it into the final cut! This extra footage, combined with the all-out intensity of the game play that lets you destroy specific parts of the robot war machines depending on where you hit them, make Terminator 2: Judgement Day one of the hottest games to ever appear! Play it where you find coin-op games now!

SEGA UNVEILS NEW HOLOGRAPHIC TECHNOLOGY!!

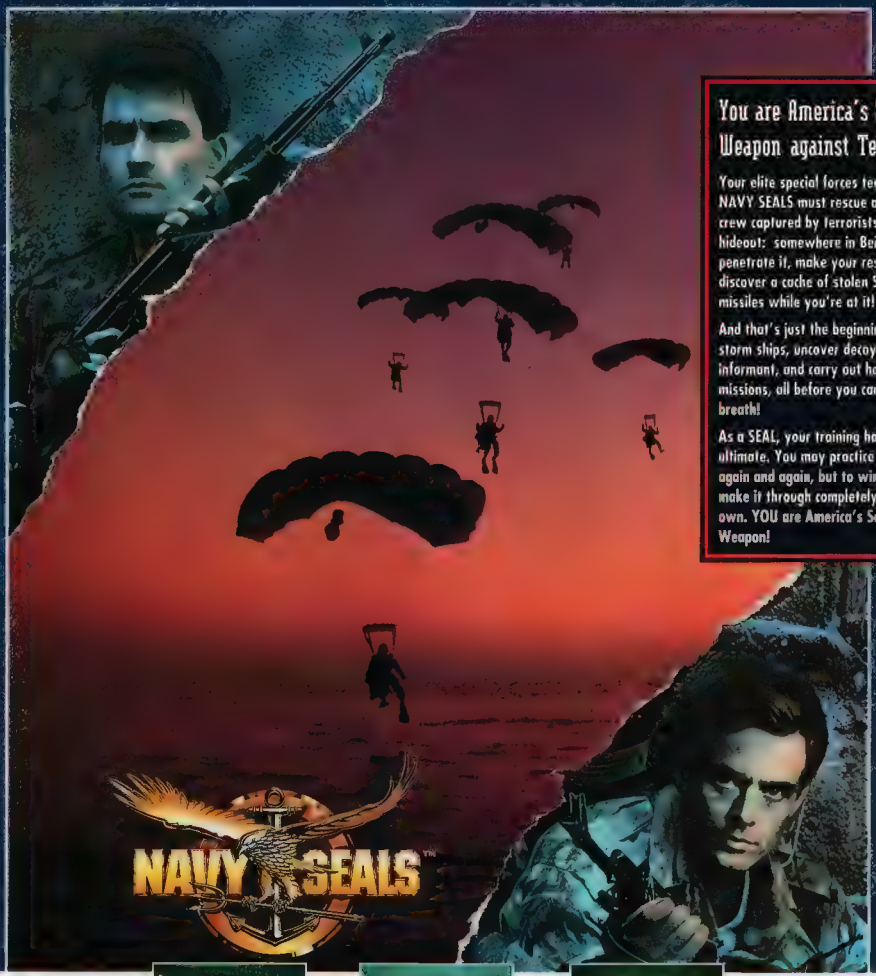

Video games have gone holographic!

Now, this exciting technology is being harnessed in Sega's latest coin-op entry, Time Traveler. By using an industrial laserdisc player and a special monitor display, Time Traveler is capable of producing images with an incredible three-dimensional quality to them. Don't look for any wimpy computer characters either, because Time Traveler uses the actual images and voices of live actors to play out its 26th century saga.

As Marshall Gram, you've been selected to journey through time, fighting past the evil renegade scientist Vulcor to reach the beautiful Kyi-La, Princess of the Galactic Federation. Standing in your way are a variety of time zones featuring everything from cowboys to ninja warriors to space knights.

With its exciting storyline and amazing visuals, Time Traveler represents another breakthrough in arcade entertainment from Sega!

MUSYA

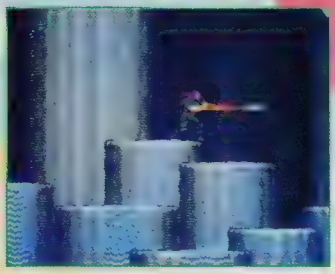

8 MEG | DATAM | NOVEMBER 1991

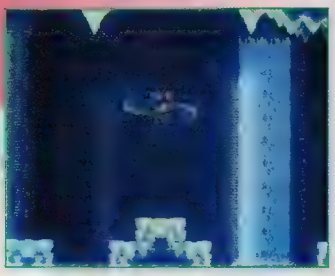

The Legend of Kosojinrai Musha is an action adventure featuring the quest of a legendary warrior who must rescue a young girl and seal off a cave filled with deadly horrors. The girl is the daughter of the man who has been guarding the cave to prevent the return of the devils who have plagued the land. Using a traditional Japanese lance, you must enter the cave and battle the demons holding the innocent girl. Once she is saved, you must get back to the surface and seal off the cave again so the devils cannot return again. There are seven levels you must pass to be victorious over the evil that is returning to your world. Along the way, you will find weapons and armor that was placed there by a former guardian of the caves. Use it to bring you victory, for defeat means the end of the world as you know it!

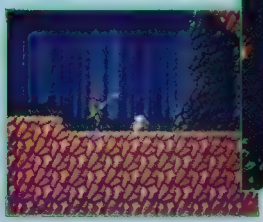

Tremendous backgrounds and exciting music add to the mood of Musha. As the heroic fighter of legend, only your spear can ward off the onslaught of vicious demons who want you dead!

AN ADVENTURE WITHOUT EQUAL

One of the latest developments from Sony for the Super Famicom is the radical sequel to Solstice. This game takes a whole new approach to the action though. The entire playfield is rotated and scaled around the main character. You will have to figure out puzzles and survive traps as you venture through forest, deserts, and others dangerous places. The effect that is used to scroll the playfield has to be seen to be believed. Objects in the playfield will rotate around your character and will even spin 360 degrees! You will have to cross dangerous bridges and climb through mountainous areas before reaching your final goal. There are already plans to bring this cart out in the U.S. under the title Equinox.

Dear Friends and Sega Gamers:

As a video gamer, I'm sure you're very aware of the exciting period that our industry is currently experiencing. The size of the game playing market has increased dramatically over the past years and as newcomers enter into the market, existing gamers continue to search for new technologies which provide them with the very best in video game systems and games.

Sega is a company who's heritage of leadership dwells upon our ***"Commitment to Excellence"***. It's our commitment to providing you, our customers, with the finest in a complete line of video game systems and games in every category. Sega Genesis, the new Sega Game Gear, and Sega Master System II. ***Truly, Sega Does It All . . . And Sega Does It Better!***

For 16-bit action, nothing beats Sega Genesis. Since 1989, Genesis has been the leader and number one best seller in 16-bit systems. We are very pleased that 80% of all 16-bit game players have chosen Genesis. Genesis software is known for it's superior graphics and challenging game play. This year is no exception with the introduction of Sonic The Hedgehog - the fastest video game character ever; and other new games like ToeJam & Earl, Quackshot, Fantasia, Spider-Man, and Mario LeMieux Hockey. ***Genesis truly leads the 16-Bit Video Game Revolution.***

Sega's mew Game Gear, Japan's hottest selling color portable video game system, became available in the U.S. earlier this year. With a sharper picture than any portable screen in it's price range, Game Gear can also become a portable color TV set with the use of an optional TV tuner. New Game Gear titles feature arcade blockbusters like Shinobi, Super Monaco GP and G-LOC; great sports titles like Joe Montana Football coming this Fall; and challenging adventure games like Dragon Crystal and Revenge of Drancon.

If it's 8-bit you're into, you can't do better than the lower priced Sega Master System. A longtime leader in 8-bit graphics and gameplay, the redesigned Sega Master System II makes the best 8-bit system around even better. Its current library of hits is still growing with new titles like Strider, Spider-Man, and Golden Axe Warrior available this year. All Master System titles can be played on Genesis with the Power Base Converter.

Yes, it's an exciting time in video gaming and Sega is a primary source of that excitement. We at Sega are thrilled to have you on the Sega team and look forward to providing you with hour after hour of video gaming enjoyment in the months to come.

Sincerely,

Yo. Wha'sup? My name is Toe-Jam, and this here is my homeboy Big Rappin' Earl (guess who's Big Earl). We're a couple of cold bussin' aliens from the planet Funkotron. Check it out, Earl crashed our hype cruising vessel on the most funked-up planet in the whole universe, Earth. Now the two of us are lookin' at a most magnanimous adventure.

Looks like we're gonna have to hip-hop and explore the full Earth scene to score the Righteous Rap-master Module Speakers and munchies we'll need for the ride home. But yo, we know what time it is. By the time Earl and I blow this 'hood, we will have achieved

THE BIGGEST HIT IN FOOTBALL.

So you want a Genesis® game with real impact?
Play John Madden Football.™
A game as big and tough as the man himself. Seventeen teams. Each one blitzing and scrambling its way to Super Sunday. Each one packed with pro caliber players who you make dive, spin, jump, block, and break tackles. Just like the big boys.

SEGA GENESIS

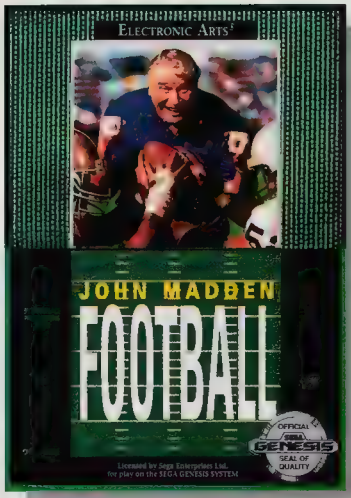

Besides real moves, you get real weather. Rain. Mud. Ice. Snow. Wind. Adjust to the conditions. Or take a beating.

Play on the all-Madden team with guys who eat their lunch out of their helmet and don't know the meaning of pain. It's real mud and guts football.

It's fourth down and you could boom one deep. Or take your chances, fake the punt, and go for it. What a total kick.

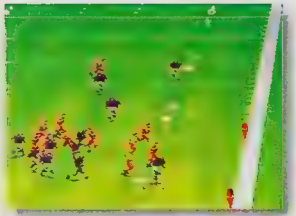

You can call more than 100 real plays, too, for complete, easy on-screen play calling. Pages ripped right out of Madden's play-book. Even audibles.

So everything's true to the game itself. Bone-jarring sounds of the trenches. Animation that will flatten you. Intense pressure. And half-time highlights and stats.

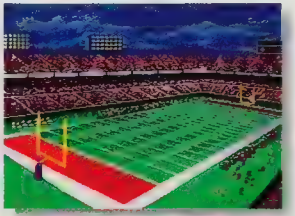

Make the right call from over 100 different plays. Keep the weather in mind and you'll put the game on ice.

Totally All-Pro moves that you control. Including spins, dives, jumps, and an end zone touchdown dance.

Now it can be Super Sunday any day of the week.

All the players have real attributes. You get guys with better hands. Guys who are faster. Even special short yardage units.

As the big man himself says, "Some guys aren't mudders. Some guys can't hold a block on grass. That's real football. That's in the game." Think you can find a harder hitting football game? Get real.

BREACH

HEY! LET´S FIGHT!!

It's all-out space war in Breach for the Sega Genesis! Years after the development of the hyperspace engine, Earth's colonies spread throughout a zone known as the Home Cluster. Due to limitations to the hyperspace phenomena, jumps were limited to the Home Cluster alone. A hundred years later, a strange artifact was discovered that acted as a hyperspace booster. This gateway allowed for true interstellar travel and caused the second Great Expansion.

Fifty years ago, the separate clusters were cut off from the Home Cluster creating the Great Panic. New federations were formed to maintain stability, and suddenly, the hyperspace gateways were reactivated. Now it appears that a conspiracy involving the Home Cluster government is underway, and hostilities have become fierce between the individual colonies. It's your job to carry out surgical strikes to divide the enemy forces. Also on your agenda are rescue operations and seek-and-destroy missions.

EQUIP THE PARTY!

You will usually start the mission in an area loaded with equipment and supplies. Grab as much as you can and head for the target area! Don't leave home without the proper weaponry and protection.

SPACE DUEL!

When you come across the enemy fortifications, you are bound to run into some guards and the like. Quickly draw your weapon and blast away! If you are successful, you can proceed without hesitation.

MISSION ACCOMPLISHED!!

All right!! It's been hard work, but you've succeeded and fulfilled your mission. Now that your target has been nullified, you must rest and prepare for your next mission.

GET ´EM UP MOVE ´EM OUT!

Get on your feet soldier! This is war, and there is no time for vacations! Look over your next briefing documents and head on out to the next target area. Good Luck!!

TASK FORCE HARRIER EX

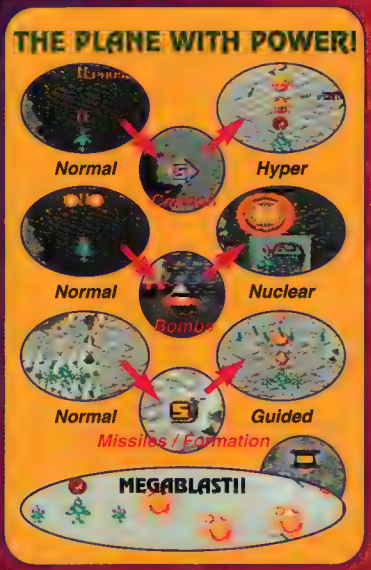

ULTRA-COOL CINEMA DISPLAYS!!

INVASION OF THE U.S.A.!!

Underground communists have overthrown the U.S.S.R. in an attempt to destroy the free world. Using the new TU-190 bomber, the rebels are preparing to launch an invincible assault on the United States.

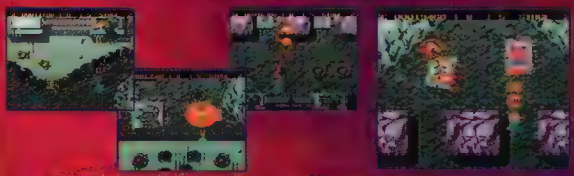

The military group FALCON is called in to annihilate the revolutionaries before they activate this deadly warbird. The impending invasion is on the horizon, and the forces are gathering. The Harrier V is the only hope to thwart rebel attack...

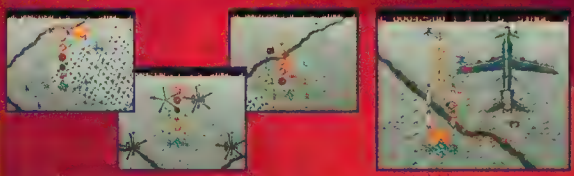

MISSION ONE

Time to launch the first offensive! The enemy fortifications are weak here, so concentrate on powering up your Harrier V war plane. Your main target is a large attack helicopter protecting the outer defenses.

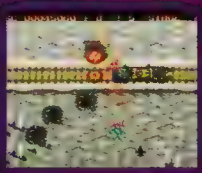

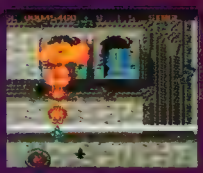

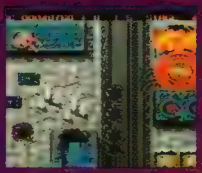

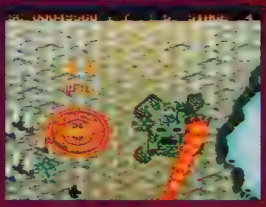

MISSION TWO

After skillfully defeating the slow attack chopper, move on to the second line of enemy defense in the mountains! The enemy is digging in, and you need to mount a massive ground assault to uproot them.

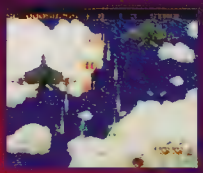

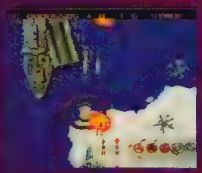

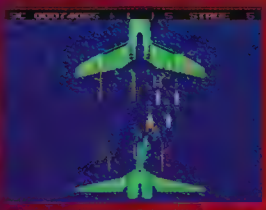

MISSION THREE

The main objective of the third mission is to wipe out the rebel's main air squadron. Four [illegible] are protecting the main bomber, so use the speed formation to avoid their deadly cannon fire.

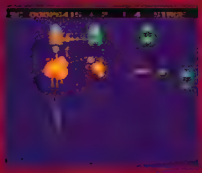

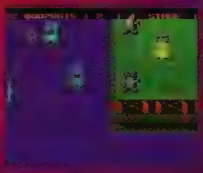

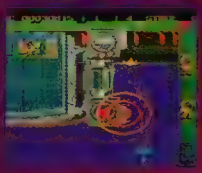

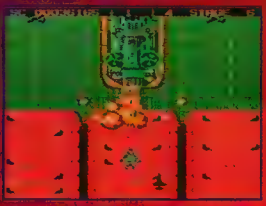

MISSION FOUR

With the rebel's primary air assault cut off, they are attempting to regroup their supplies and ammunition on the ground. Destroy the ground transports, ammunition dumps, and supply houses to suffocate the insurgent forces. Both air and ground support are protecting these vital targets, however, and speed is the essence. The nuclear flame throwing tank is the last line of defense here.

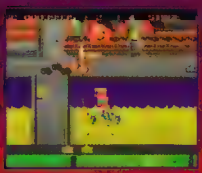

MISSION FIVE

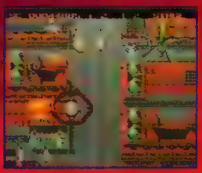

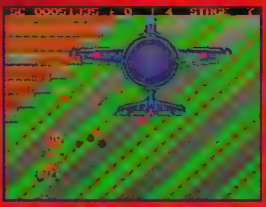

Following the flame tank's defeat, the battle flows to the open sea. Aircraft carriers learned of the Harrier V attack and quickly moved into position along the coastline. Loaded with kamikaze aircraft and missile placements, they plan to end your advancement. The final enemy here is the innovative split bomber. This war machine is capable of splitting in two and firing laser beams between its two halves! Megabombs are a must.

MISSION SIX

Utterly stunned, the revolutionaries are trying to salvage what is left of their water armada. Numerous hovercrafts and tanks line the aircraft carriers in the hopes to send the Harrier V to a watery demise. Power is a plus while slipping through the hostile enemy defenses, so grab all the power ups possible! The gigantic hyper-hovercraft awaits your arrival at the end of the mission. It should pose no problem at all.

MISSION SEVEN

Now the Harrier V has reached the outer reaches of the main rebel complex. The ground forces are the most ruthless yet, and the air support is supreme. This is the hardest level so far, but the real challenge appears in the form of an ultra-advanced stealth bomber! The huge war plane consists of two main parts: the plane and the stealth unit. Destroy the plane and the stealth unit separates and attacks! Can you survive to the end?

MORE CHALLENGES AWAIT IN MISSION 8!

NEW SOFT NEWS

As the Christmas season nears the game companies are starting to crank out games at a feverish pace. On the Nintendo front, Capcom is readying G.I. Matchbox Toys has their first game - Motor City Patrol, out to the big N for approval, and Virgin has the Mc Donalds license to do M.C. Kids. Electro Brain takes to the water with Eliminator Boat Duel while Sunsoft prefers to stay on land with a spectacular Batman sequel.

For Turbo lovers NEC has slipped another much needed shooter - Raiden into their line-up. Now let's hope they can find space for Final Soldier. Their sports series just got a quick boost with Davis Cup, Kick Boxing and Champions Forever Boxing. Look for these and more next month!

GRADIUS 3

(Konami/Super NES)

Trick Full Power-up - Pause the game and use the old familiar UP, UP, DOWN, DOWN, LEFT, RIGHT, LEFT, RIGHT, B, A, and unpause. You will explode as this is a boobytrap from the programmers for those trying to cheat.

GRADIUS 3

(Konami/Super NES)

30 Extra Ships - If you've been having problems going up against the Bacterion Empire then maybe a reserve of 30 Vic Vipers will help. At the title screen just hold LEFT and hit the A button 3 times. When you start the game you will have 30 ships.

MegaMan to go.

When the stompin cyclops springs into action, you better step on it.

The swooping copterheads just might be your greatest challenge yet.

If the giant fan is blowing, only a ledge jump will save you from the spikes

Dr. Wily's most challenging robot masters will be there when you pump up the GameBoy. And knowing the maniac he is, he's probably concocted a new one or two. Can you survive the eight empires before you break into Dr. Wily's lab? Well, if you've experienced MegaMan before, you know it's no day at the beach. But good reason to get going on MegaMan in Dr. Wily's Revenge. Now.

Where are we?
I think we're in a Die Hard ad!
Excuse Me, I Have A Message From Die Hard
From this day forth DIE HARD will be including free translated instructions with each import game, they'll also have translators on hand in case you have any questions during your game!
I believe this makes import games easier to own and play than ever before! And from what I hear, they get the games faster than a speeding dragon, or that wrethced hog I keep seeing...he ran over my foot. Soon they will have import game reviews and tips in their member's catalogs. Such gamers should be knighted...but I can't find the king, does anyone have a map of Dragon Quest?

STAR WARS

MAY THE FORCE BE WITH YOU!!!

In a period of civil war, rebel forces attacked the Galactic Empire, from hidden bases. This surprise attack caught the Empire off guard and the rebels won an easy victory..

During the battle the rebels managed to steal secret plans to the Death Star - an armored space station so big it could wipe out an entire planet with one direct shot.

Your mission is to destroy the Death Star before the Dark Forces have a chance to use it. You must use the plans and try to figure out how to destroy the Empire. Then you must seek out and destroy the Death Star to complete your mission.

Before you destroy the empire, you have to find one of the two droids you bought from the Jawas that has disappeared. Then, go to the Death Star and rescue Princess Leia.

PRINCESS LEIA

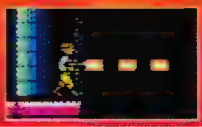

Leia is very helpful in combat. Her only line of attack is with a laser pistol. You'll find her in the Death Star prison.

HAN SOLO

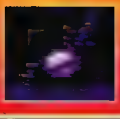

You'll find Han in the first scene being attack by bounty hunters. If you save him he'll give you a lift to the Death Star.

The Empire game starts out right where the first one leaves off. You start on the ice world of Hoth and you must get to two other planets.

The only way that you will be able to defeat the dark forces and come face to face with Darth Vader in a lightsaber war, is to master the power of the of the force. That you must learn from the all mighty Yoda. First however you must find him.

TOTALLY COOL CINEMA DISPLAYS!!!!

TOTALLY TINY!!

Jump in you car and wait for the green flag. But this isn't just any old race. This is a real down to earth' type sprint. Like tiny - in a micro machine! Being so small, the courses are weird - a kitchen table, over school desks, or in your bath tub! The obstacles are strange too. Dodge cheerios, loop around pool balls and cue sticks, and drive a boat in your bathtub around bars of soap. You can get different cars every time you qualify for a race, and these little cars will run at high speeds so be careful. Play head to head with a friend or take on the computer. Either way this is a race you won't soon forget!

You will drive around many obstacles like cheerios, pool balls and nuts!

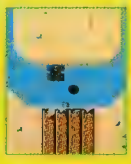

You will get different cars when you win races. Try to get first every time!! Good luck!

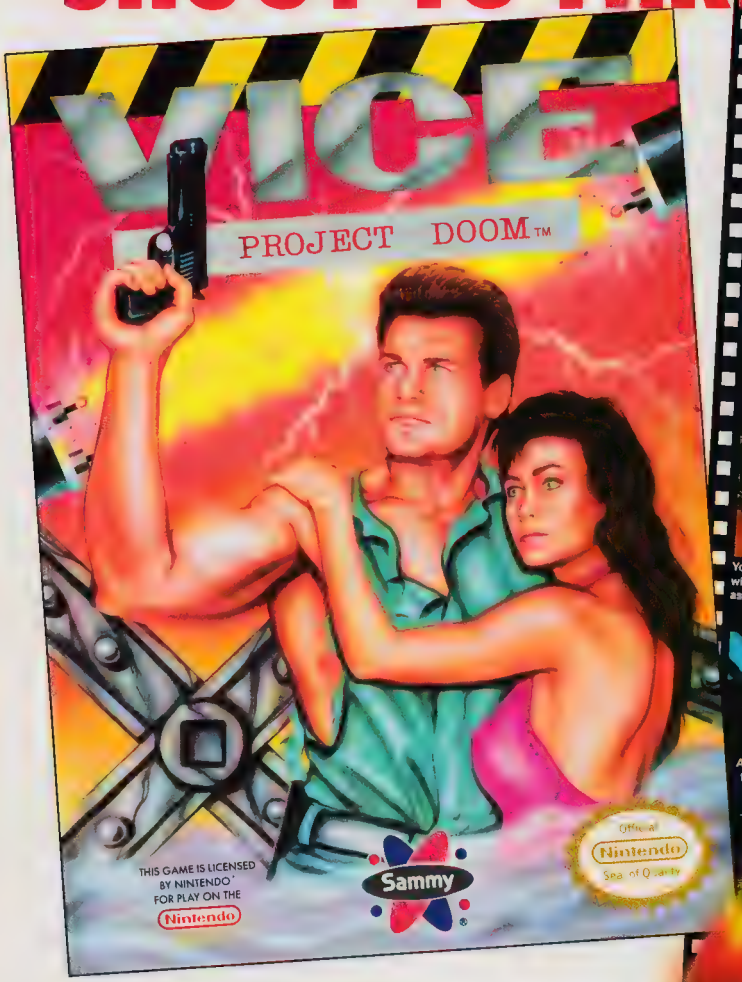

Pick you race partners!!

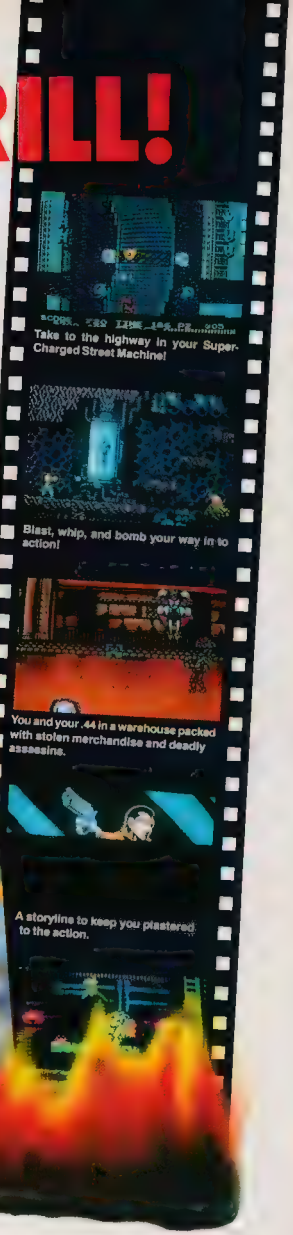

SHOOT TO THRILL!

Vice officer Quinn Hart is on an assignment unlike anything he's ever seen! Weird bodies are turning up dead, top secret weaponry is missing, and organized crime is at an all time high. But Hart's up against something more than the Mob, street gangs, or even hostile terrorists.

A new force has risen and Hart finds himself plunged into a conspiracy of terror!!

THE LAST RACE!

The Earth has finally had its last dance with the human race. Thanks to careless efforts of wasteful human beings, the Earth is now dying. Furthermore, we've also become so full with nuclear waste as the other planets sent from the evil Earth administration, creating a violent race of destroying creatures that have started attacking us planet after planet. This is the point of a new type of ship which has been specially developed to eliminate all the troublesome creatures.

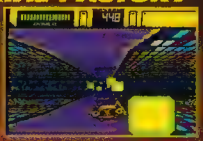

There are a total of seven stages to clear up. Depending on how good you are you can upgrade your attack power, but in order to do that you must prove yourself by defeating a certain number of aliens. Each stage has its own background and you can get better speed and weapons and shields. Watch out for dead ends and don't forget to destroy your ship energy or you'll lose. Good luck, you're going to need it!

Use these strips to replenish your power when you are in dire need of energy

BILL LAIMBEER'S COMBAT BASKETBALL

FACT-FILE
Manufacturer: Hudson Soft
Machine: Super NES
Cartridge Size: 4 Meg
Number of Levels: NA
Theme: Sports/Action
Difficulty: Easy
Number of Players: 2
Available: October

THE MAIN MAN AND HIS ARMY, ERR...TEAM.

IT'S TIME TO REDEFINE "MAKING A SHOT"

In the future, everyone can hear you scream. That is the basic concept behind Bill Laimbeer's Combat Basketball. It is 30 years into the future, Bill Laimbeer has just become the head of the NBA, and he wants to make a few changes in the style of the game. In this version, you'll have to play on the courts with armor plating. Why? Merely the fact that there are mines, flying bombs, and airborne rotary blades all over the field! A good enough reason? Change your stats to give you more strength so that you can have a major slam fest with your opponents. If you really want to have some major slicing and dicing fun, have a friend over to play. This is definitely the future of Basketball!

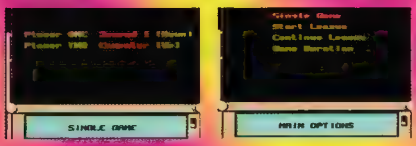

YOUR BRAWN IS THE WAY TO GET THE BALL!

YOU GOT ONE AWESOME ARSENAL, TOO!

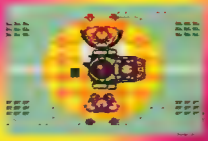

MANY STATS AND OPTIONS!

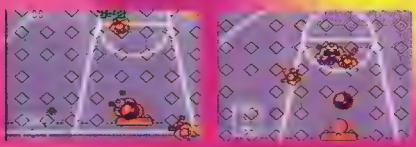

HALFTIME!

This is obviously one of the latest ways to properly execute a toss up throw!

MAKE YOUR SHOT!

GAME OVER!

You can select the difficulty level to keep the game challenging!

HE'S SUPER SONIC!!!

The most famous hedgehog in the world is about to be blown away as the U.S. National Video Game Team gives you tips and strategies to help you play your best. Take a look at these awesome maps that when combined with our special techniques you'll send your Sonic scores into the stratosphere.

GREEN HILL ZONE ACT. 2

In this level get all of the rings up to point 1. Use a light tap and jump in the left of the spikes to find the secret room. Break through the wall to the right and stay on the lower part of the level. When you get to the red springboard, use it to get you on top of the loop and collect the 1-UP. Collect 100 rings without touching the lamp posts and then the

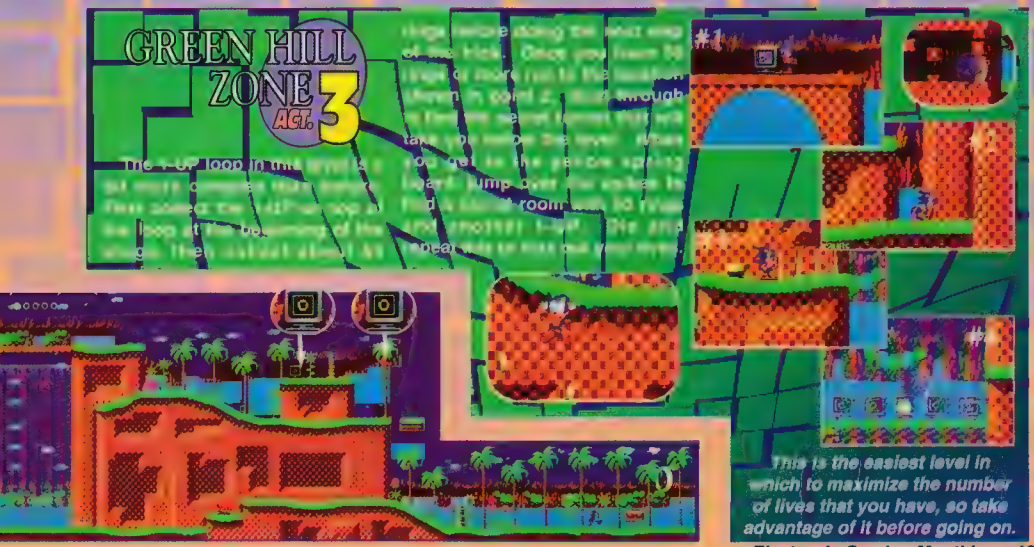

This is one of many 1-UP areas in this game. Remember these techniques to boost your skills!

GREEN HILL ZONE ACT. 3

The 1-UP loop in this level is a bit more complex than before. First collect the 1-UP on the loop at the beginning of the level. Then collect about 50 rings, before doing the next step of the trick. Once you have 50 rings or more run to the location shown in point 2. Walk through the invisible wall to reveal the secret room. Here you will take you inside the level. Make sure you get to the yellow spring board and jump over the spikes to find a hidden room with 50 rings and another 1-UP. The area will respawn so you can repeat this as many times as you like.

This is the easiest level in which to maximize the number of lives that you have, so take advantage of it before going on.
